HANDLING TECHNOLOGY

### Introduction

With over 25 years of experience in a vast array of industries, worldwide RJD's success is based on, consistently delivering quality fabrications, on time and on budget. RJD has built over many years an enviable reputation, which has seen many returning customers highly delighted with the service and quality.

### Dedicated to Quality

RJD operates a Quality Management System approved by CCAS (Chamber Certification Assessment Services) to BS EN ISO 9001:2000. Its responsibilities are enshrined in the company's core values and therefore a factor in every decision made by our employees. We guarantee full compliance with all necessary quality demands including those of our clients own internal requirements.

### Safety Matters

We at RJD believe that an excellent company is by definition a safe company. Since we are committed to excellence it follows that minimising risk to people plant and products is inseparable from all the other company objectives.

Our in-house safety advisor implements procedures and systems that make a successful safety conscious organisation producing high quality goods at a minimum cost.

Profits and safety are not in competition, on the contrary we believe safety is good business

2005/431

RJD Engineering & Fabricating offer a wide range of products & services including:

**Engineering Design:** offering a complete structural design and drawing service. Using the latest 2d and 3d design software.

**Steel Fabrication:** including bridge fabrication, pipework fabrication, platework fabrication, roundwork fabrication, stainless steel fabrication, structural steelwork fabrication.

**Precision Machining:** operating a full in-house machining facility.

**Steel Installation:** erecting and installing equipment and steel of our own manufacture or supplied by customers.

**Bridge fabrication**

**Sign gantries**

**Pipework fabrication**

**Foot bridges**

**Platework fabrication**

**Architectural bridges**

**Roundwork fabrication**

**Rail wagon bodies**

**Stainless steel fabrication**

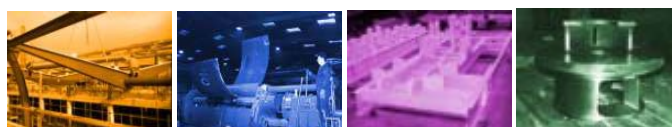

**Offshore Steelwork**

**Structural steelwork**

**Pipe work configurations**

**Structural buildings**

**Sugar processing plant**

### Structural Steelwork Installation

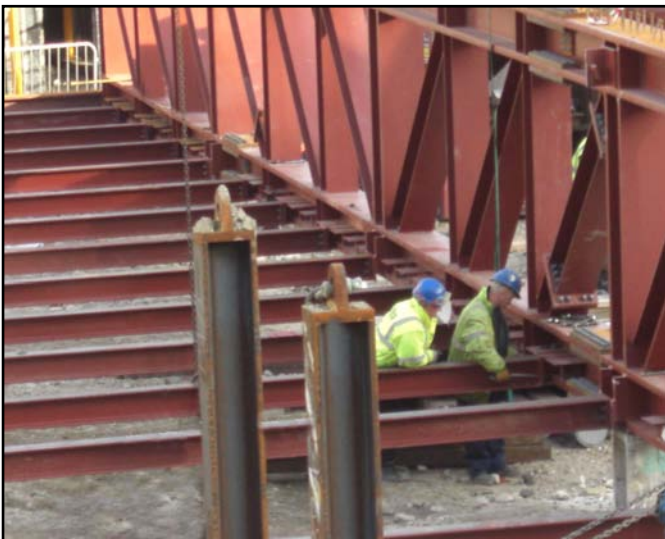

RJD's construction and contract managers operate the installation services.

RJD not only erect and install equipment and steel of our own manufactures but also equipment supplied by the customer or others.

This construction department also incorporates our site maintenance team, available for short or long term contracts worldwide. Fully skilled in all aspects of Steel erecting and use of lifting equipment, the team are thorough and professional.

Such is the experience available within the department that complex heavy lifting projects have been undertaken successfully on time and on budget. Lengthy Manpower contracts have been operated with contracts up to £2 million.

RJD have installed portal frames, sign gantries and bridges to complex structures for leisure centres, hotels and material handling facilities.

# ENGINEERING COMPANY

## Engineering

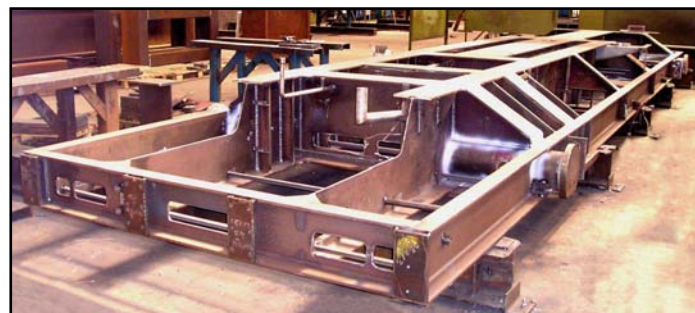

RJD specialise in various complex plate-work fabrications ranging in plate thickness up to 200mm. In house expertise allows us to work in different grades of steel including corten, stainless and 3cr12 (lifting capacity-60 tonnes)

Anchored, machine levelled assembly frames ensure the flatness of the units is maintained throughout production.

Our design department utilises the latest computer software such as CADs, CSC, AutoCAD, STRU-CAD and X-STEEL. Benefits of our in-house engineering design include total control over engineering projects, design and specification changes with minimum disruption.

All work to a minimum of ISO 9001:2000 quality standard, other quality and engineering standards available to meet customer requirements.

Recent design inclusive contracts are of a varied nature, ranging from large span lattice framed buildings and heavy industrial plant support structures to small and medium sized buildings and structures associated with various industrial and commercial new build and refurbishment contracts in all parts of the world.

### Engineering Precision

RJD's in-house machining facility has the capability to Fabricate and machine base plates trailers and tanks, which are frequently undertaken in our purpose built machine workshop.

The horizontal planing machine 4 axis CNC universal head including DRO, is used to finish machine plate fabrication to detailed customer drawings.

Our main items of fabrication plant are:

- Vertical Milling Machine Complete with D.R.O.
- 14 Overhead Cranes
- 500 Tonne Press
- 250 Tonne Press
- 2 Profile Machines (Including 1 CNC)
- 1 Pyramid Roller (4m X 25mm)
- 1 - 16 Tonne Mobile Crane
- 1 - 50 Tonne Mobile Crane
- 3 Lathes (In-House Machining)
- 1 Plasma Arc Cutting Machine
- 3 Sub Arc Welding Machines
- 1 Horizontal Planing Machine 4 Axis CNC Universal Head
